EXPERIENCE

Target

Sep 2025 – Present

Senior Engineer

- Developing Machine Learning models and Agentic AI systems, using MLOps to build data collection, feature engineering, and training pipelines. I also apply AI-driven strategies to optimize the SEO performance of Target's web pages, improving content ranking and visibility through data-driven insights.

EdgeVerve

Sep 2022 – Aug 2025

Senior Member of Technical Staff (PE)

- Architected and implemented Centralized User Management with IAM Keycloak, leveraging FastAPI for the backend, leading to 40% faster authentication processing and enhanced security compliance.
- Developed multiple Proof of Concepts (POC) with FastAPI, Gen AI, AI Agents (LangChain, CrewAI), Kong API Gateway, OIDC, SAML Protocol resulting in 30% reduced development time for future integrations.
- Collaborated with cross-functional teams, ensuring seamless integration of APIs and microservices, which reduced deployment failures by 50% through robust CI/CD pipelines using GitHub Actions, Jenkins.

Infosys

Jan 2021 – Sep 2022

Specialist Programmer

- Designed and optimized various Logistics backend APIs for XPO Clients, transitioning to FastAPI and Flask with Azure Cloud, RabbitMQ, Kafka, Kibana, Grafana, Prometheus, and New Relic leading to 30% faster data processing and 20% cost reduction.
- Achieved back-to-back victories in the prestigious Infosys STG Group Internal Hackathon.

John Deere

Aug 2019 – Mar 2020

Software Intern

- Developed a Tkinter-based dashboard for real-time data visualization, an RPA tool for automated data entry, SAP HANA, ELT pipelines, and an image recognition system using OpenCV, Pandas, and TensorFlow.

PROJECTS

Nandi AI

Jan 2025

- Generative AI-based tax information portal that leverages semantic splitting, embeddings in Pinecone and MongoDB, to help users query Indian court tax judgments related to Direct and Indirect taxes.

Hitaya Finance

Jun 2024

- Built a Multi-Agent Framework for Financial Analysis using CrewAI, leveraging PEER (Plan, Execute, Express, Review) and DOE (Data-fining, Opinion-inject, Express) modes to enhance market trend prediction, optimize portfolios, and improve data accuracy by 40%.

HitayaOne

Jan 2024

- Developed Medical Diagnosis App, an AI/ML-powered application that leverages PyTorch, TensorFlow, Scikit-learn, XGBoost, and Pandas to analyze x-ray scans and medical data for accurate diagnosis, aiding healthcare professionals in detecting disease patterns and enhancing patient care.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL, LUA, C#, CSS, HTML, TypeScript

Developer Tools: Jupyter Notebook, Git, Azure, PyCharm, VS Code, GitHub, Azure, AWS, GCP, Postman

Technologies/Frameworks: FastAPI, Flask, Django, Pandas, Tensorflow, PyTorch, Angular, React, Docker, Linux, Docker, Kong API Gateway, Kubernetes, LLMs, Keycloak

EDUCATION

Asansol Engineering College

2016 – 2020

B.Tech in Computer Science Engineering - CGPA - 8.74/10

CERTIFICATIONS

- Generative AI Specialization
- Tensorflow Developer
- Deep Learning Specialization
- Software Architecture
- Practical Devops
- Natural Language Processing

PUBLICATIONS

Construction of Efficient Wireless Sensor Networks for Energy Minimization using a Modified ACO Algorithm

ACHIEVEMENTS

- Won 25+ Global Hackathons
- LeetCode 1600+ Question Solved
- Informatica Data Hackathon (1st Prize 4000 USD)
- Intel Hackathon (2nd Prize 2000 USD)
- Accenture Sustainability Hackathon (2nd Prize)
- KPMG Global Hackathon (2nd Prize 4000 USD)
- ATMECS Global GEN AI Hackathon (3rd Prize)
- SMILe Logistics Innovation Hack (2nd Prize)
- Indegene Hackathon (1st Prize)
- Coinbase Global Hack for Web3 (3rd Prize)
